

FEATURES & BENEFITS

- Available in 600, 650, 750, 850, and True 950 CFM
- Available tumble polished with Red™ or Black™ billet.
- Available in all new Hard Core Gray™ hard coat anodized with Black™ billet. First-ever hard coat anodizing on fuel bowls and mainbody - actually penetrates the aluminum for superior corrosion protection.

Important note: Venturi sizes vary considerably from previous Holley i.e new 950CFM is larger than the previous 1000CFM, the new 850CFM is larger than the old 950CFM etc.

Part #	Venturi Diameter	Throttle Bore	Description
0-80801RD	1.250"	1.562"	600 CFM Shiny Aluminum Ultra HP - with Red Billet
0-80801BK	1.250"	1.562"	600 CFM Shiny Aluminum Ultra HP - with Black Billet
0-80801HB	1.250"	1.562"	600 CFM Hard Core Gray™ Aluminum Ultra HP - with Black Billet
0-80802RD	1.250"	1.687"	650 CFM Shiny Aluminum Ultra HP - with Red Billet

0-80802HB	1.250"	1.687"	650 CFM Hard Core Gray™ Aluminum Ultra HP - with Black Billet
0-80803RD	1.375"	1.687"	750 CFM Shiny Aluminum Ultra HP - with Red Billet
0-80803BK	1.375"	1.687"	750 CFM Shiny Aluminum Ultra HP - with Black Billet
0-80803HB	1.375"	1.687"	750 CFM Hard Core Gray™ Aluminum Ultra HP - with Black Billet
0-80804RD	1.562"	1.750"	850 CFM Shiny Aluminum Ultra HP - with Red Billet
0-80804BK	1.562"	1.750"	850 CFM Shiny Aluminum Ultra HP - with Black Billet
0-80804HB	1.562"	1.750"	850 CFM Hard Core Gray™ Aluminum Ultra HP - with Black Billet
0-80805RD	1.625"	1.750"	950 CFM Shiny Aluminum Ultra HP - with Red Billet
0-80805BK	1.625"	1.750"	950 CFM Shiny Aluminum Ultra HP - with Black Billet
0-80805HB	1.625"	1.750"	950 CFM Hard Core Gray™ Aluminum Ultra HP - with Black Billet

6061T6 BILLET ALUMINUM METERING BLOCKS

- Improved durability, true gasket sealing (sealing surface integrity), bright dipped anodized for good looks and corrosion protection
- Fully adjustable (emulsion bleeds, power valve channel restrictors & idle feed restrictors). Power valve channel restrictors now machined lower in metering block for improved fuel delivery to power valve circuit
- Accelerator pump channel now internally drilled eliminating need for external plug
- Excess material removed for improved fuel capacity
- Integrated pry-point assists in disassembly from fuel bowl and mainbody preventing damage to gaskets and gasket surfaces
- New snap in place bowl vent whistle makes removal and/or replacement easier

6061T6 BILLET ALUMINUM BASE PLATES

- Improved durability, true gasket sealing, bright dipped anodized for good looks and corrosion protection
- Elongated (dual pattern) mounting holes allow fitment on intakes with square flange (Holley 4150™ style) or large flange (Holley Dominator® style)
- Dedicated race-only throttle lever with all unnecessary street attachment points & tangs removed
- 950 CFM throttle shaft comes slabbed and undercut for improved airflow
- Stainless steel adjustable secondary link. Provides choice of 1:1 or progressive secondary throttle actuation for ultimate control of secondary opening rate
- Knurled (hand adjustable) primary and secondary curb idle screws allow for easy idle adjustment without the use of tools
- Primary throttle shaft capped to prevent entry of debris & contaminants
- Factory machined accessory mounting hole for easy addition of adjustable throttle stop
- Throttle body and new secondary pump cam lever designed to provide positive throttle stop on secondary side. Delivers safe & reliable 90° opening and return of throttle plates while ensuring maximum airflow
- Baseplate designed with a boss that can be consumer machined for vacuum source

ALL NEW FUEL BOWL DESIGN

- Completely redesigned from the ground up for racing
- 20% more fuel capacity vs. a traditional v-bowl eliminates fuel starvation and provides consistent air/fuel ratios
- Internal baffling to help control fuel slosh and minimize float level fluctuations in hard launching or cornering situations
- Fuel shelf below the needle and seat to greatly minimize fuel aeration and promote more consistent metering
- Fuel trough designed into floor of bowl to route fuel flow directly to the jets and assist in keeping jets covered by fuel
- Clear Pyrex® sight windows on both sides of bowls for easy and safe fuel level adjustments
- (A) Built in drain plug in front center of bowl provides easy access to empty contents of bowl
- (B) Contoured entry provides smooth fuel flow directly to needle & seat
- -8AN (o-ringed) inlet threads offer a large variety of plumbing options (come standard with -8AN o-ring to -6AN male adapter and -8AN plug). Can be plumbed from either side
- Material added in key areas (needle & seat area, fuel inlet, sight window area) for added strength in the demanding race environment
- Note: New lengthened fuel line required due to increased length of bowls (see Holley p/n 34-42, 34-43, 34-44 or Earl's p/n AT104195ERL, AT104295ERL & AT104286ERL)

UPDATED MAINBODY DESIGN

- Air bleeds moved outward to allow a smoother transition of airflow from the top of the carburetor into the venturii
- Integrated idle bypass valve eliminates the need for holes in throttle plates and allows for proper adjustment of idle while maintaining correct throttle plate to transfer slot relationship. Helps maintain good idle control when using radical camshafts.
- All unnecessary mounting bosses removed for a smoother, cleaner appearance
- Contoured hex head squirter screws for streamlined airflow
- Cast in Holley H P logo for easy identification by race sanctioning bodies

- Available in 600, 650, 750, 850 and True 950 CFM
- Available tumble polished with Red™ or Black™ billet.
- Available in all new Hard Core Gray™ hard coat anodized with Black™ billet. First-ever hard coat anodizing on fuel bowls and mainbody - actually penetrates the aluminum for superior corrosion protection.
- Adjustable Throttle Stop bracket and WOT Microswitch brackets available
